# Product Info & Instructions

**LEWIS**™

**Yellow slide** unlocks safety hood and sets blade depth

**Safety hood** snaps shut and locks after cut

**Ergonomic handle** designed for both left/right hand users

**Attach to lanyard** for safe keeping

## Lewis K710 LOCKING SAFETY KNIFE

*with AUTOMATIC LOCKING SAFETY HOOD*

**Safety Hood Snaps Shut After Cut!**

### FEATURES:

- Safety hood snaps shut and locks once contact with the cutting surface is lost
- Easy-tool-free blade change
- Ergonomically designed for use with either right or left hand
- Safety hood is clear for easy viewing of the cutting edge

Use Lewis Utility Knife Replacement Blades (#B10CHD)

### OPERATING INSTRUCTIONS:

1. Press yellow slide and push forward (1/4" blade exposure) or back (3/4" blade exposure) to set depth of cut.
2. Press and hold front of yellow slide to release safety hood lock.
3. Press tip of safety hood on cutting surface and start cutting (once pressure is on safety hood, yellow slide can be released).

1/4" Depth Setting (6.35 mm)

3/4" Depth Setting (19.05 mm)

### BLADE REPLACEMENT

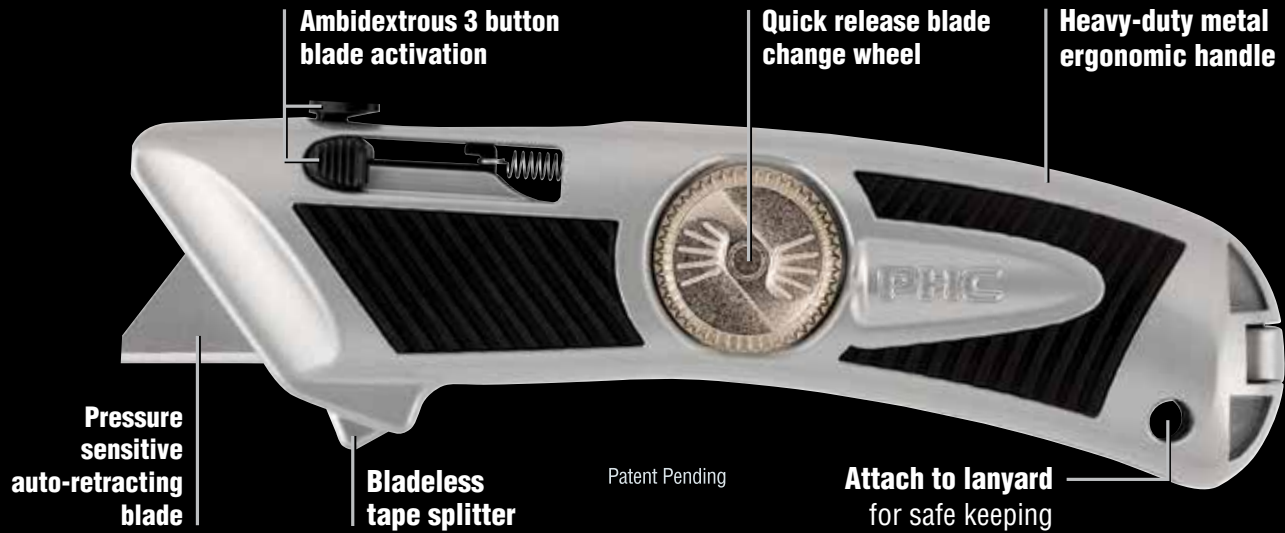

1. Pull down latch on right side of knife and pull backbone down to expose blades.
2. Move latch forward so that blade lock slides away from blade.
3. Replace blade with spare blade provided.
4. **IMPORTANT:** TO CLOSE KNIFE MAKE SURE ARROWS ON BACKBONE ARE LINED UP BY THE WORD "CLOSE", OTHERWISE THE LATCH WILL BE DAMAGED (SEE INSET).
5. Slide backbone back into the body of the knife and swing latch up into body to lock.

Brought To You By

# QBAR™ Auto-Retractable Safety Knife

## Fully Auto-Retracting Blade Increases Safety!

**Cutting**

Extend blade and cut. Pressure sensitive blade automatically retracts once blade loses contact with cutting surface.

**After Cut**

Blade will automatically retract, even with thumb still on button.

**Tape Splitting**

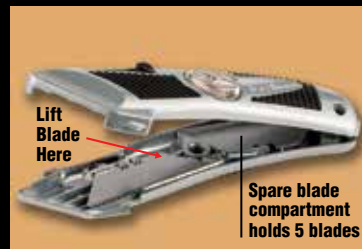

Slice through tape easily with bladeless tape splitter to extend life of blades and increase safety.

## Easy Blade Change:

Rotate quick release blade change wheel counter clockwise to open safety knife.

Remove new blade from spare blade compartment. Insert new blade underneath blade retainer, aligning blade notch with alignment tab. Close knife and rotate wheel clockwise to lock. Dispose of used blade safely.

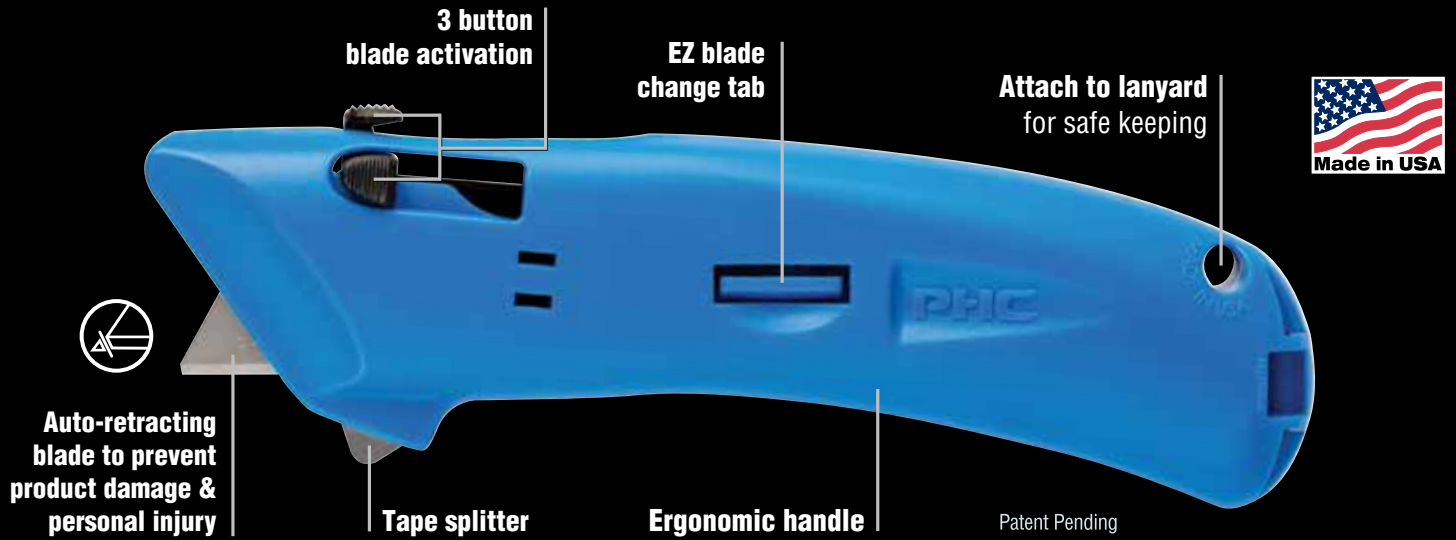

**Use SPS-92**  
Duratip Safety Point Blades

**or SB-92**  
Standard Utility  
Replacement Blades

Safety Holster  
Available!  
UKH-675

# EZAR™ Auto-Retractable Safety Cutter

## One safe & easy tool for your cutting needs:

**Top Cut**

Extend blade and pull across top corner of box for a perfect top cut

**Plastic Straps**

Always cut at a 45 degree angle

**Tape Cut**

Poke splitter into tape and pull  
**DO NOT** use blades to cut tape

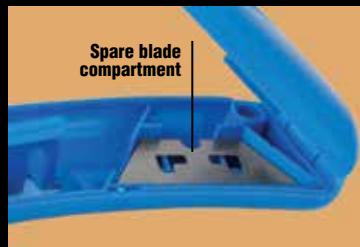

Auto-Locking  
Safety Holster  
Available  
UKH-675

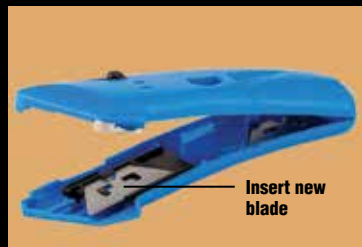

## Easy Blade Change:

Push EZ blade change tab upward and open safety cutter.
